Set Up iPhone

Set Up as New iPhone ›

Restore from iCloud Backup ›

Restore from iTunes Backup ›

What does restoring do?

Your personal data and purchased content will appear on your device, automatically.
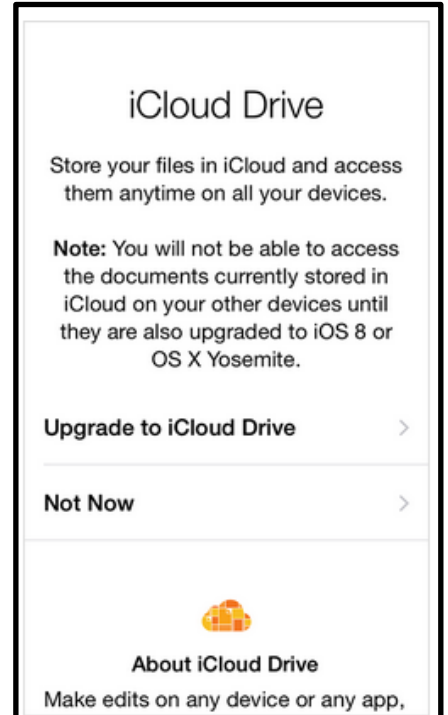

Set up your device as new or restore it from an old device using an online backup

You will then have to agree to some terms and conditions in order to continue.

Apple ID

You can then create your apple ID, or you can select skip this step and set this up at a later date. For help on this visit the Apple website.

iCloud Drive

iCloud Drive enables you to store files and access them at any time, when you upgrade all of your files that are stored on iCloud will be moved onto the iCloud Drive. This operating system specific.

Touch ID

If you own an iPhone 5s or later, an iPad Air 2 or later or an iPad mini 3 or later you can set up Touch ID, this is when you can use your finger print to unlock your device, make purchases and even sign into some accounts.

Create a Passcode

A passcode protects your data and is used to unlock iPhone.

To protect the data on your device you can set up a password, if you do not want to use one tap on "Don't Add Password"
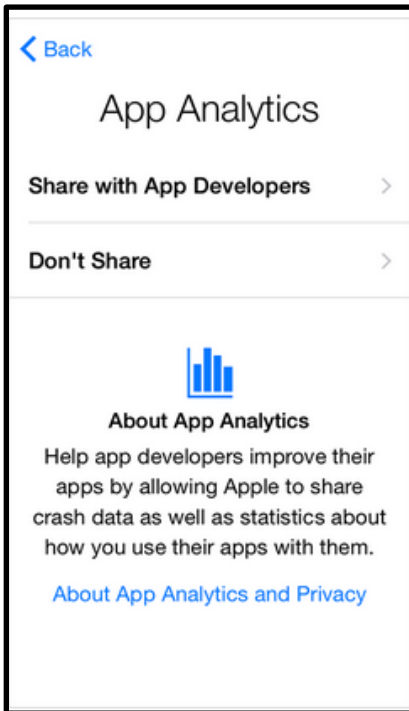

For added security if you type in a commonly used password you will be asked to input a more secure one in.
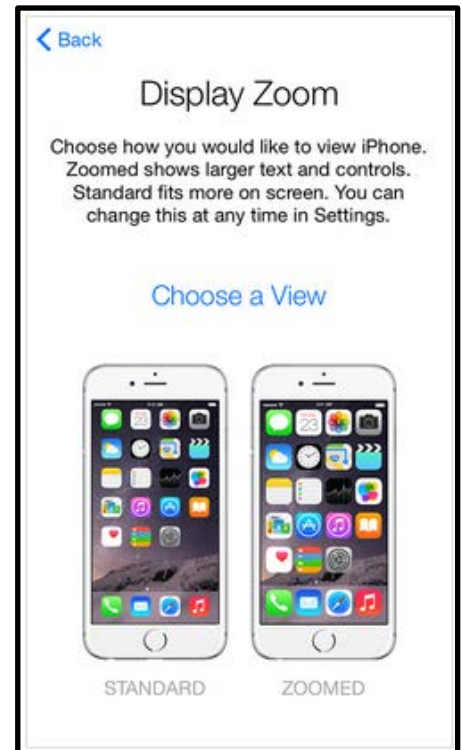

This option keeps your safari usernames and passwords, credit card information and WI-FI network information up to date across all of your approved devices.

iCloud Keychain

To set up iCloud Keychain on this iPhone, approve it from one of your other devices using iCloud Keychain or use your iCloud Security Code.

Approve from Other Device >

Use iCloud Security Code >

Don't Restore Passwords >
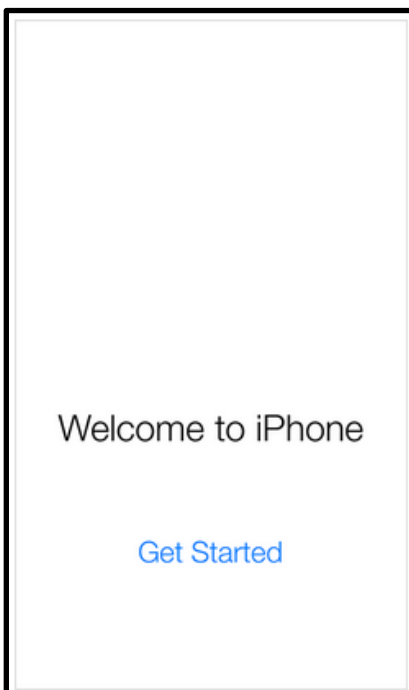

About iCloud Keychain and Privacy

Siri enables you use your voice to carry out a number of tasks such as search the web, sent text messages and so on.

This option will share information with app developers, if you select share and then change your mind you can turn this off at any time in settings.

If you have an iPhone 6 or 6 plus you can choose between two display resolutions, standard and zoomed. Zoomed shows larger text and icons.

You are then able to use your device.
