

Setting Up Wikis

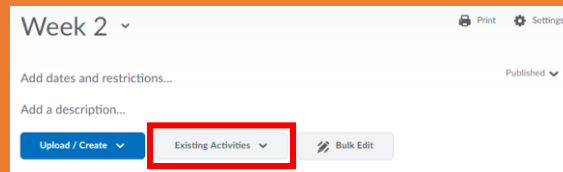

1

Once you are in the module of choice. Click on the Content section of the module navigation bar.

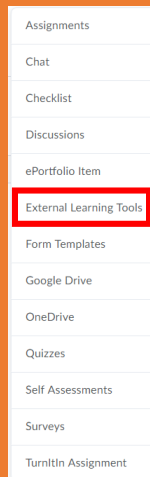

2

Then find the area within the Table of Contents where you would like to set up a wiki. You will then need to click on Existing Activities.

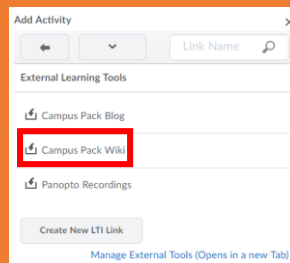

3

A drop down list will appear, click on External Learning Tools from the list.

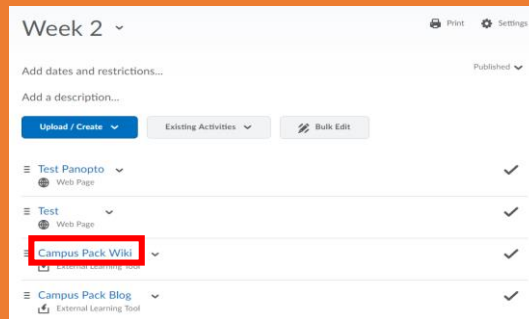

4

Then click on Campus Pack Wiki.

5 Then click on the title of the wiki you have just created.

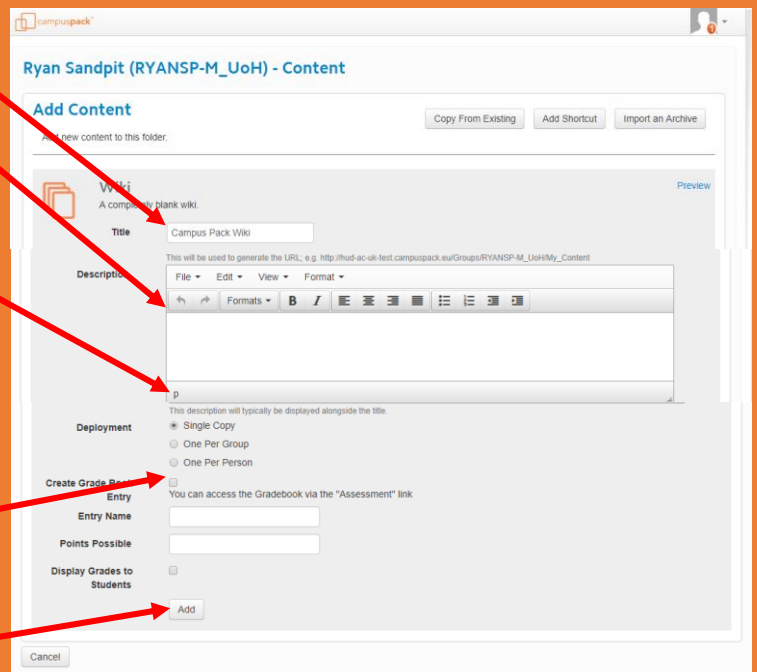

6 You can edit the title of the wiki if you wish. A description can also be added using the text editor.

There are three different types of wikis. A single copy is one wiki shared by everyone within the module, wiki can also be assigned to one per person. Please note that the One Per Group option does not work, if you would like to create a group wiki, please see the how-to guide explaining how to do so.

If you want the wiki to be assessed, make sure this option is ticked. You can then add an entry name, the points possible and whether you want to display the grade to students.

Once everything is set up, click on **Add** to create the wiki.

7 The wiki has now been created.
