

## Marking in Brightspace – Using Turnitin Rubrics

This guide shows you how to use a Turnitin rubric that has already been created and attached to an assignment. If you have not yet done this, see the relevant how-to guides on ipark

**1** Once you are in the Feedback Studio, click on the *Rubric* icon. The rubric will then appear on the right hand side.

**2** Move the *sliders* for each criterion to give it a score. The grade will be automatically calculated. You can see the description of the criteria at the *bottom of the panel*. To view the full rubric with descriptions, click on the *arrow icon*.

**3** To use this grade on the assessment, click *Apply to Grade*.

**4** When you have finished marking, *close* the page. Your feedback will be automatically saved.

**5** To see the score, click on the *refresh* button. It will be saved automatically, and set as a draft grade.
