

# RefWorks

# Refworks

- Produced by ProQuest – good integration with Summon
- Cheaper than Endnote
- Institutional subscription – individual licenses also available

# RefWorks allows you to...

- Create a personal database online
- Import references from Summon/other databases
- Organise and Management information
- Format bibliographies using Write-N-Cite – used in Macs as well as Word

# Other features...

- No specialist software required: web-based service
- Make public all/part of the database(RefShare)
- Portable: accessible anytime, nearly anywhere
- Mobile interface introduced in 2009
- Share information: can disseminate info online
- Upgraded automatically – no need to reload the software
- Customization

# RefWorks Flow

Additional features include

- Upload full-text PDFs and other file formats
- Populate citation info with metadata
- Annotate and highlight text passages
- Share collections, documents, citations, annotations and notes with colleagues
- Upload bulk citations from other programs (including Endnote, Mendeley)
