

## Turnitin QuickMarks – From UniLearn to Brightspace

The Turnitin QuickMarks you created in UniLearn, should automatically have been transferred across to Brightspace. However, if this doesn't seem to be the case, this guide will show you how to export a QuickMark Set from UniLearn and import it into Brightspace.

**Note: UniLearn will only be available till December 2018**

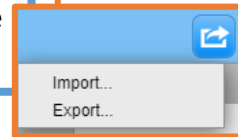

1

First, go onto your UniLearn module. In the Control Panel click on *Module Tools*. There you will see the list show in the adjacent image, choose *Turnitin Assignments*. Click on an assignment and then on the *Libraries* tab along the top. Then choose the *QuickMark Manager*.

2

Find the QuickMark set you want to export by looking through the names listed on the left hand side of the manager. Once you have selected the QuickMark set you want, click on the icon in the top right and select *Export*. A file will download to your computer. Make sure you save it somewhere you can find later.

3

You now need to go into the Brightspace. Once in Brightspace, you need to go onto a submitted Turnitin assignment and click the pencil icon.

4

Open up the QuickMark section of the feedback studio and click on the settings icon (looks like a cog/gear). Then click on the three line menu in the top left hand side of the QuickMark pop-up.

5

Select *Upload Set*. You can then drag and drop your file into here, or browse to where you stored the file.

6

Now close this window using the close button in the bottom right hand corner. The QuickMark set will now be available to choose from the drop-down menu next to the settings icon.
